Tony Mendoza
(The gadgets kid) Marty's younger brother, loves video games, enjoys playing sports, but most of all loves tinkering with gadgets. He is quite quick to understand how devices and small mechanisms work and sometimes assembles new ones from parts of others.

History

Childhood

Tony has always been friendly and socially extroverted, which is a contrast with his older brother. After the death of Dr Mendoza Tony focused on being an emotional support for his mom. It gets frustrated at times with Marty's over protective behaviour, and his reclusiveness.

**He was born the same week his father died, so he grew up only knowing him through stories and old photos. By the time he gained awareness, he was already being raised by his brother, Marty. Since Tony was able to attend school, he found it easy to make friends and attended a drone showcase at his school. His friends pressured him into sneaking in backstage a d hijacking the drone. While he 3nded up crashing it and causing his family trouble, he discovered his k kac for piloting drones dedicated to this as his hobby

Tony is quite good at piloting RC vehicles, specially aerial drones that he has learned to custom built.

Important past events

The death of his father
His mom's abduction

Best accomplishment

Wining a drone race at 10

Other accomplishment

Creating a mini spy drone he calls "The Fly"
