EXT. AGRICULTURAL SECTOR. DAY

We open on a vast green field, a beautiful vista free of concrete and smoke. Machinery off in the distance graze the fields, steamrolling through and leaving behind fresh grass and seeded earth. Among the great grass fields, we see a boy running through.

As we move closer to the boy, we see what at first looks like frolicking, but instead as we move even closer, we see him running in desperation, perhaps fear. Something metal and grey hovers above him.

Now far closer than before, we see terror in the boy's face, all covered in dirt and grime, carrying what seems to be fruit in his overalls, as the machine above him sirens away.

He moves further into now traces of concrete roads, submerged in earth and plant, now we see him between ruins of skyscrapers from a bygone era. As he swerves around corners, he finds himself a hole, what was once a sewer. And throws himself in.

INT. SEWER LINE. DAY

The boy crashes downward splashing into a river of muck and rust, but he can't slow down, he lifts himself up as fast as he can and trudges through the muck as the machine follows behind crashing and grinding against the sewer walls.

The boy slides around corners causing the sewer water to fall upon the machine's sensors. We see a POV of the machine being covered in mud water. "DANGER SENSORS COMPROMISED" flashes on its UI.

The machine clumsily grinds away at the walls, slowing down before finally combusting in an abrupt explosion causing the boy to fly forward and splash around.

The boy gets up seeing the wreckage of his pursuer. He looks both ways of the pipe realizing there's no one else following behind. He takes a deep sigh, and proceeds to run along

The boy arrives at a plank of wood that he removes revealing a hole that he crawls through.

INT. COMMUNE. EVENING

Inside the hole is a warm light blanketing tin cans, curtains, and worn out rugs. There are several blocks of curtains with people moving in and out of them

The boy arrives at curtain far off from the entrance decorated in crayon drawings. Next to it, just outside is an old TV set.

Behind the curtain is a silhouette of a man lying in a hospital bed. He's snoring. The boy takes out an apple from his coat pockets and passes it through the curtain

KID

Got you this mister. Should last
you the next day or 2

The man's hand reaches to the apple and he pulls it to his torso as he lies back down. The boy with a half smile heads towards the TV set.

He sits down, chris cross applesauce in front of the TV and switches it on. The TV plays various of similar advertisements as he saw outside as he switches between them.

KID (CONT'D)

Nothing on again!

He looks behind the TV. There's a stack of DATA PODS with sticky labels on them; "BROADCAST #3" sticks out amongst them and he pulls it out.

KID (CONT'D)

Where'd you even get these old
timer?

The man in the bed says nothing.

The boy takes the pod and inserts into a machine with a circular indentation. It lights up and the screen changes to a news broadcast. The boy sits back down, eyes glued to the screen

MAN IN BED

You'll burn your eyes out like
that!

KID

Shhhhhhhhhh!!!!

The kid is locked in. We don't see what he sees only the blue glow enveloping the room. Explosions coming from the speakers

REPORTER

We're here live at what looks like
weaponized android attacking the
city center! Sources say that a
fight broke out shortly aft-

The boy fast forwards. We now see what he sees. A warzone of
fire and metal. The reporter hiding behind the wreckage of a
vehicle.

REPORTER (CONT'D)

Greg I am now here up in front of
the action and it looks like
Children! Are fighting the
Machines!

The camera moves above the wreckage as we see the children
using holographic manifestations to battle large machines
with mechanical tentacles.

The man turns his head. We don't see his full face only his
eyes. We get his POV as his gaze looks between the curtains
through a thing slit behind which is the TV the action taking
place in a small little box

We now see his eye reflecting the light

REPORTER (CONT'D)

Eye witnesses seem to be calling
this young kids, the-

MATCH CUT TO:

INT. MENDOZA HOME. MORNING

Just like the man in the future, a boy lays in a bed as his
alarm sounds off. His eyes open slowly. Then close. Then

BANG the door behind him breaks open with a powerful kick!

TONY

Time for school babycakes!

A kid, TONY, no older than 13 stands at the door of this
boy's bedroom with a tooth brush in his mouth. The boy, MARTY
falls out of his bed.

CUT TO INTRO:

DROID SCOUTS EPISODE I

INT. MENDOZA HOME. KITCHEN. MORNING

A plate of 3 eggs and exactly 2 strands of bacon on a plate slides into view. Marty gazes down in dissapproval as if it were some kind of punishment.

TONY

Again EGG-Z?

A machine hovering around the kitchen spins around to answer Tony

EGG-Z

As Mrs. Mendoza's instructions!

A woman comes out from behind the machine. Briefcase in one hand and coffee in the other. She's sporting a nice suit under a large lab coat.

TONY

Mom! EGG-Z keeps cheaping out on the bacon

MRS. MENDOZA

He's giving you exactly what you need for your metabolism if if EGG-Z says you need less bacon then you need less bacon.

Marty keeps playing with the egg yolks leating them leak onto the bacon as he continues to pout

MARTY

(under breath) maybe EGG-Z should adopt us while he's at it to.

Their mom doesn't hear that, or at least she doesn't see me to. Toast pops out the toaster and she catches it with her teeth.

MRS. MENDOZA

(toast in mouth) I'll be picking you guys up late from school.

Tony and Marty are surprised.

TONY

Why's that?

MRS. MENDOZA

I told you didn't I?

They shake their heads.

MRS. MENDOZA (CONT'D)
(swallowing the rest of her toast)
Darn it, my bad guys. We're having
a big celebration at the lab. Big
things are happening!

MARTY
What big things?

She kisses Marty on his head, and does the same to Tony

MRS. MENDOZA
I'm in a hurry guys but I promise
you I'll tell you all about it when
we get home. Love you guys!

She leaves the house in a rush. Tony listens as their mom
drives off, waiting till she's just out of earshot.

He clasps his hands in prayer.

TONY
We're safe!

MARTY
YOU are. And she's picking us up
late so she doesn't even have to
know.

TONY
Hey, this changes nothing. You
still promised remember?

Marty finishes his plate of eggs

INT. UNKNOWN PLACE/ UNKNOWN TIME.

It's pitch black only the sounds of blaring engines are
heard, but nothing like the engines we know. The sound of the
wind growing louder and louder.

NARRATOR
What kind of world do you see 50
years from now?

Finally, lights, bouncing off a reflective surface it goes
vertically from up to down as if speeding through a dimly lit
tunnel. The sounds of engines still echoing.

NARRATOR (CONT'D)
Is climate change no more? Has
poverty been eliminated?
(MORE)

NARRATOR (CONT'D)
Or perhaps world peace has finally
been achieved?

The figure of the reflective surface is now even more visible, it's a car of sorts, but nothing we'll see until the next several decades or so.

NARRATOR (CONT'D)
The future is full of possibilities
only limited by the barriers we
place on ourselves.

The vehicle is approaching a bright light illuminating the darkness.

NARRATOR (CONT'D)
So all we need to do is, break them
down!

The light gets brighter and brighter until

FADE TO WHITE

EXT. MAIN CITY. EVENING

Our first look at the city, a gorgeous landscape full of towering buildings and flying vehicles. A giant zeppelin leaving trails of pure energy float high in the sky and video billboards decorate the tallest buildings. We follow the vehicle to the skies of a forest of pearly white buildings circling around a central tower with a logo on it that reads I.D.E.A. The vehicle leaving a green trail of light as it moves.

NARRATOR
At the Institute of Discovery
Engineering and Automata, we are
dedicated to surpassing our horizon
and bringing your dreams of
tomorrow today.

We see attractive people in lab coats in front of computers, working on machinery smiling, and interacting in lounges.

NARRATOR (CONT'D)
From, our chemists to our engineers
to our robotics and Artificial
Intelligence experts, we work day
and night to brighten up your city.

A handsome man in a clean lab coat walks up facing the audience. Our narrator

NARRATOR (CONT'D)
I'm Doctor Simmons, and I invite
you to remember.

The company logo transitions in front of his face as we zoom
out

Every great innovation begins with an IDEA!

The company logo transitions in front of his face as we zoom
out

INT. IDEA LABS BREAKROOM. NOON.

As we pull out of a view screen, Dr Simmons' face still
smiling, we see his very visage reflected on a young man
(18). A scientist walks by

RESEARCHER 1
Hey Mitch! Excited for today?

MITCH
For sure man! I'll see you there
right?

RESEACHER 1 (O.S)
(chuckling) You know it buddy!

Simmons disconnects from the commercial he was watching, as
he steps into the engineering bay, greeted by a man (43) and
a woman (44)

DR.STEVEN ZHAO
Mitchell, old sport, how have you
been?

MITCH
Oh! Dr. Zhao, it's been a minute.

The woman walks by

DR.BIYU ZHAO
(stern) More like thousands

DR.STEVEN ZHAO
Bah don't listen to her, c'mere
(extending his arm for dab)

Mitch responds with a solid dab like one would a close
relative.

MITCH
How's Ren doing

DR.BIYU ZHAO (O.S.)
Top of her class, what more can you expect?

We see a photo on the workbench, a young girl in cap and gown

DR.STEVEN ZHAO
Entering college early really did wonders for her, but I worry about her social life. The age gap can't make things easy (beat) To be honest we had hoped you could follow her as well.

MITCH
Trust me I heard plenty of it from dad

DR.STEVEN ZHAO
Oh, I know, that's why I try not to hold it over you. And I'm sure she's making plenty of friends.

DR.BIYU ZHAO
(filling up a cup of coffee) If she's doing things right she'll have no time for friends. She can make plenty at the labs once she graduates.

She sets the mug down

CUT TO:

INT. MEDICAL R&D.

A pitcher full of a sort of acid. An unknown substance poured straight creating an oily layer on top

DR.RESHA KALAM
Bear in mind this only simulates the effect of pollution, the true test would be on a human subject

DR.MIKA PAVLOV
Of course

Dr.(chandramom)takes a small metal vile with a security lock on it. The lock dislodges releasing a string of what looks like metallic sand, NANOMACHINES. They create string to the acid.

DR.RESHA KALAM

Observe as the machines track the source of "infection" within the larger body.

The micro swarm begins to tear at the oily substance.

DR.MIKA PAVLOV

The machines are no longer fizzling away!

DR.VAIB KALAM

Good eye! We've vastly improved the durability of the machines. They can withstand toxic and acidic substances, so they can tank just about anything you throw it into.

The glass begins to crack. The swarm is now attacking the base of the pitcher

DR.VAIB KALAM (CONT'D)

Love, power down the systems will you? (turning to the Pavlovs)
Apologies we're still working on its logic systems so it knows to powers down.

DR.SARA PAVLOV

We understand.

DR.MIKA PAVLOV

How's Chandra been by the way

DR.VAIB KALAM

Oh! she's been doing swimmingly.
Heartrate has been top notch like always.

DR.MIKA KALAM

I mean at school.

The Kalams look at each other with worry.

DR.RESHA KALAM

To be honest she doesn't say much, every time I ask she just starts talking about something else. I'm a little worried

DR.SARA PAVLOV

Dasha has been doing the same thing!

DR.SARA PAVLOV (CONT'D)
Just the other day she we got a
call from the principle that she--

DR.MIKA PAVLOV
It's been quite difficult to get a
grasp on what's going on with her.
Maybe we should set them down one
day, the four of us.

DR.VAIB KALAM
Whatever it is, I'm sure they're at
least looking out for each other.

CUT TO:

EXT. CITY ELEMENTARY. NOON.

A girl (9) sits in a sandbox playing with a STUFFED DRAGON
and a green army man. The green army man climbing up a dune
of her own making.

CHANDRA
(as army man) Ancient BiBi! You
have blown up my entire squad and
left me for unalive! Why!

CHANDRA (CONT'D)
(as dragon) Because Sgt Smallhead.
You are the nicest and kindest
soldier in all the land, and I must
now have you marry my beautiful
darling daughter! Princess Bean!

An egg shaped TOMOGACHIESque device erodes from the sand

CHANDRA (CONT'D)
(as the princess) Oh dear soldier
wouldst thou take my hand in
marriage?

STOMP. A sneaker crashes into the sand causing the soldier to
fly away and the dragon to fall over.

3 girls (9-10) stand over CHANDRA looking down on her in
disgust.

BULLY 1
Sorry! Didn't mean to interrupt you
and your "friends"

Chandra looks up. Not a sign of sadness on her face

CHANDRA
That's okay! Do YOU want to join us
Christy?

CHRISTY and the other girls start laughing

CHRISTY
No thanks! We've got more grown up
things to do

BULLY 2
Maybe you should join US

BULLY 3
Yeah! this way!

Chandra takes her Dragon, BIBI with her holding it tight as she follows the girls into the back of the school. The kids around duck their heads but one girl gets up following far behind them. Upon seeing this, the other kids scam.

EXT. CITY ELEMENTARY. ALLEY. NOON

The girls arrive to a dark corner of the school's exterior. Christy is ahead while the other girls follow behind Chandra.

CHRISTY
Ok, this should be far enough

She snaps her fingers. The other girls grab Chandra by her arms while Christy takes BiBi away.

CHANDRA
No! Give him back!

CHRISTY
Oh! "Him"! So it's a boy. Chandra,
you should know better than to hang
out with boys so much. People might
get the wrong idea.

She continues to struggle

BULLY 2
We should help her out!

CHRISTY
You're right!

Christy takes a pair of scissors from her backpack,

CHRANDRA
Don't hurt BiBi!

The girls laugh

CHRISTY

Don't worry, we're just gonna make
a few little touches.

She takes the scissors to BiBi's wings. We can see Chandra and the other 2 girls reflected on BiBi's beady eyes. Then, in that reflection: A FIGURE behind the 3 girls.

ANOTHER GIRL, dislodges the two bullies from Chandra's arms, and pushes them forward onto the ground. Spooked, Christy drops BiBi on the ground.

We see the girl more clearly now as she steps in front of Chandra. Blond, slightly taller, looking fierce, it's--

CHRISTY (CONT'D)

Dasha! You're supposed to be
suspended!

Saying nothing, she comes at Christy who readies herself with the scissors. She jumps, stepping off the school's wall into a kick right at the scissors knocking them out her hand.

Christy yelps, falling to the floor. Dasha standing over her.

CHRISTY (CONT'D)

My mom called.

After a beat of silence, Chandra starts clapping. Christy crying immediately follows. The teachers slide in from the alley entrance.

TEACHER

Dasha! Not again!

CUT TO:

INT. IDEA LABS TOP FLOOR.

All of IDEA's greatest minds are gathered in a lab sectioned out for a grand event. We see the Zhaos, Kalam's and Pavlovs mingling with other scientists from other branches. Jubilee.

Mitch is serving himself some punch while Dr.Mendoza appears behind him.

MRS. MENDOZA

Are you old enough to be drinking
that young man?

MITCH
(startled) Oh Dr.Mendoza no- I mean
yeah it's none-

MRS. MENDOZA
I'm kidding Mitch! No need to be so
strung up. Hey, you mind stepping
in my office I got something I need
to talk to you about.

MITCH
Oh, yeah, sure!

CUT TO:

INT. MENDOZA'S OFFICE.

Unlike her home, her office is neat, organized. Her desk is
free of clutter, with only her holocomputer and a photo of
her family sitting on top. GLARE COVERS HER HUSBAND'S FACE

MRS. MENDOZA
Go ahead! Take a seat.

She sits on her chair

MRS. MENDOZA (CONT'D)
I wanted to hear your take Mitch.

Mitch is a bit surprised

MITCH
Mine? on what?

MRS. MENDOZA
This project. Are we maybe moving
too fast? I mean is the world
really ready for something like
this?

She puts a strange flashdrive device on her desk.

MITCH
To be honest I don't really know
what it is, I haven't been
clearance on specifics

MRS. MENDOZA
What do you know?

Mitch goes serious, leaning in.

MITCH

It's some kind of matter converter.
It uses a combination of
holographic mapping and
nanotechnology like what the
Pavlovs are working on.

MRS. MENDOZA

A+

MITCH

But what it's for? You're gonna
have to help me out with that

Mendoza gives a slight chuckle. Then a beat of silence.

MRS. MENDOZA

Do you trust me Mitch? Trully?

MITCH

Of course. You helped me out when
my dad passed away. And you've
even tutored me on basic mechanics.

MRS. MENDOZA

And if I told you to do something
without our investors knowing, then
I can trust your discretion?

Mitch takes a beat, he's a little scared to answer but then
his view hardens.

MITCH

Of course.

She analyzes him. Sitting with the silence. Then a smile, he
sunny demeanor resurfaced.

MRS. MENDOZA

Great! Then I have an important job
for you.

She gets up, then Mitch follows as they start to exit the
office

MITCH

What is it?

MRS. MENDOZA

I'll tell you after the party, once
we reveal what we've been working
on I have some big things planned.

INT. IDEA LABS RECEPTION

we're now in the reception office for IDEA labs with a young receptionist sitting behind the counter. He's on the phone while looking at a television program on his holo computer.

RECEPTIONIST

Yeah no, I called her again but she's not picking up. (beat) well, what do you want me to do, go to her house? I'm just not that kind of guy

A group of figures approach the reception desk, men in grey suits. They approach in droves on the unsuspecting minimum wage employee.

RECEPTIONIST (CONT'D)

Yeah look I know what you're saying but...

He notices the figures in front of him now.

Excuse me sirs could you take a seat I'll be right with you.

The figure drops a package on the desk. An inconspicuous cardboard box with a large M on it.

RECEPTIONIST (CONT'D)

(to his phone) Here, I'll call you back

He hangs up

RECEPTIONIST (CONT'D)

Okay sir, I'm just gonna need you to pass this on to security and you should be good to go.

The two guards from the back step forward to examine the box's contents. In the boxa machine with mechanicle tentacles grabbing both guards and slamming them against the wall. The receptionist cowers as the shadows envelop him.

CUT TO:

INT. IDEA LABS HALLWAY. EVENING

A crowd of men in grey suits are holding the receptionist hostage as they make their way across the halls, passerbys are thrown into various rooms by the other "Grey Guys"

A security guard charges at them from behind with an electric batton. The nearest Grey Guy immediatly stops them grabbing his wrist. The grip tightens, causing the poor security guard to scream in pain. He drops the batton. The crowd moves on

CUT TO

INT. IDEA LABS CENTRAL LABORATORY. EVENING

Various adult scientists are working on machinery and computers. Some Are typing away at a keyboard, others are experimenting with new ways of controlling robotics, and even a group working with dangerous chemicals. Not quite the glamorous vision IDEA's commercial showed us but regardless, men and women at work to provide for the city.

A static filter fade in

INT. IDEA LABS SECURITY ROOM. EVENING

We zoom out and see a computer screen showing us what we just saw as men in grey suits peek in. One zooms in on a group of scientists sharing a toast as he presses in on his earpiece.

GRAY GUY #1

Yes sir it's them.

A muffled voice is heard

GRAY GUY #1 (CONT'D)

Understood

He presses on his earpiece once more, nodding at his fellow Gray Guys.

CUT TO:

INT. IDEA LABS CENTRAL LABORATORY. EVENING

The group of scientists still celebrating in the laboratory when one of them raises her glass, a scientist with the name tag reading L.Mendoza.

MS. MENDOZA

It's been several long grueling months but we made it. Thanks to all of your combined talents...

The team claps

and the help of our dear intern
Mitch Simmons, whose father would
be so proud of what we've
accomplished...

She motions towards Mitch, the young intern working under the
scientist

The dream we've fought and
sacrificed so much for is finally
within our reach

She holds up a transparent flash drive. the other scientists
turn to each other and smile

MS. MENDOZA (CONT'D)

This... is going to help so many
people. And with you're continued
support, we'll be able to-

Suddenly, the alarm rings. All the scientists begin to panic
and mutter as the emergency lights blink red. One scientist
begins to run towards the emergency door lock when the door
itself opens before he can reach it, revealing one of the
"Grey Guys". He pulls out an electric stun gun of some sort
and fires it at the scientist.

Many other Grey Guys come from behind running into the
laboratory as we see them wrangling the various scientists
who attempt to flee. Mitch is seen guiding the scientists to
an escape exit but is then blocked off by the Grey Guys, one
of them attacks Mitch but is then saved by Ms Mendoza.

MS. MENDOZA (CONT'D)

This is my phone! The device is
inside, Access the last app and
enter the lab code. A protocol
will immediately activate.

A beam hits the wall behind her. Ms, Mendoza takes a shot
back.

Take the emergency pod and give
this to my sons.

MITCH

B-but...

A Grey Guy approaches the scientist from behind but she's
ready with a net launcher of her own design and fires upon
him. She then grabs Mitch by the collar, slaps a strange
device to his wrist, and pushes him away.

Mitch makes his way across of sea of fire and beams trying to
find a way out. Then, salvation. He spots a metal grate and
beams straight towards it.

Crouched down, he takes a screwdriver from his belt and opens it making his way into the airvent.

INT. AIRVENT. EVENING

Mitch ventures forward into what others would call a metal labrynth, but not Mitch.

MITCH

(under breath) okay okay, no
problem, just gotta make my way to
the emergency deck. Noooooo problem.

KRANG the section of the vent in front of him lossens as if ready to fall apart. He needs to proceed carefully.

A tall man in a black suit, with a scar across his right, all patched up in a cybernetic eye, stands over the chaos. A Grey Guy approaches him.

GRAY GUY #2

Doctor, the intern took the drive with him, we were too la-

Without a second thought, Dr. Garoussen grabs him by the face and smashes him against the wall, showing but a silhouette of a body sliding down it.

Ms. Mendoza is heard chuckling.

She is being held down by many Grey Guys when the dark figure approaches her.

MS. MENDOZA

Can't feel great to come all this
way and not get what you wanted.
And now you'll never find it, I
sent it somewhere you'll never-

Dr. Garoussen looks down on her in spite and is about to finish her off. *BLEEP BLEEP BLEEP* his earpiece begins to blink and beep prompting him to immediately tap on it.

DR. GAROUSSEN

Master (beat) yes we have her now,
but the drive...

His expression changes from angry to smug as he looks down at her again

DR. GAROUSSEN (CONT'D)
Of course, I'll make the necessary
preparations.

He taps his earpiece again and chuckles at the scientist.

DR. GAROUSSEN (CONT'D)
Your children...

She looks shocked

DR. GAROUSSEN (CONT'D)
and not just your children, but
those of your colleagues. Don't
worry You'll be seeing your sons
soon and The Drive will be in my
master's hands soon

CUT TO BLACK:

Title Card

EPISODE 1: DRIVE
(character intros)

EXT. ST NEWTON ACADEMY COURTYARD. AFTER SCHOOL

A young boy sitting at a lunch table with beef jerky in his
mouth, typing away at a laptop with a frog insignia. Lines of
code continue to grow like trees as he types.

A group of kids his age walks up to him as he types

KID #1
Hey Marty, me and some friends are
gonna chill at the flake shake
after school if you're down.

Marty is seemingly too engrossed with his screen to pay them
any mind as we see the code reflecting on his glass

1000

es

KID #1 (CONT'D)
I guess another time then

They walk away

KID #2
Told you he was gonna say no.

KID #1
He didn't really say anything
though

Marty looks back at them as they walk away regretfully before turning back to his screen.

MARTY
(under his breath) Alright, let's
go ahead and give you a hand buddy

He hits ENTER on his keyboard.

CUT TO:

INT. ST. NEWTON CLASSROOM. DETENTION

We see on a digital board in bright red "DETENTION" as various students are sitting in the class bored out of their minds. Among them a boy named Tony, elementary school age, red hair with a smirk across his face.

The teacher supervising them sits behind his desk looking at his dating profile when his screen becomes covered with various pop-ups with a frog insignia blinking on his screen, saying in comic sans "OH NO :("

TEACHER
What the...?

The children in detention begin to chuckle. The teacher looks confused till he looks at the board to see his desktop display projected on the electronic board.

The teacher tries to fiddle with his computer

TEACHER (CONT'D)
Everyone stay in your seats!

In the commotion, the classroom door opens up with Marty waiting by the door motioning towards Tony to come to him.

Tony sneaks out with Marty as the two make their way to the school gates.

(after this, we should introduce the other characters)

-We should move in order of age, so Ren then Dasha and then Chandra

-Each kid should have a complex they're dealing with, maybe not introduce their issues right away, but perhaps have moments like with Marty where they are struggling with some aspect of themselves.

-After their intro then we can move into the major chase.

(side note: only Marty and Tony should have the chase but we should set up that the other kids are also being pulled away to be taken to the lab, slowly foreshadow that what went wrong at the beginning is going to affect the world in a big way)

INT. HALLWAY. AFTER SCHOOL

The two brothers run towards the exit laughing their heads off

TONY

What took you so long? I thought I was gonna die of boredom in there.

MARTY

This kinda thing isn't exactly easy, doesn't help that the people that set up the school's defenses are actually smart, unlike the teachers.

The two continue laughing as they cross the gate expecting to see their mother pick them up from school. Instead, it was Mitch

EXT. SCHOOL GATES. AFTER SCHOOL

Mitch stands by a futuristic but frumpy car looking disheveled and exhausted. He's staring intently and worriedly at his phone. Marty and Tony look confused

MARTY

Uh, Mitch?

MITCH

(nervous and terrified) AHH, WHAT?
Oh, boys. hey, I uh Uhm

Marty and Tony look at each other

TONY

What are you doing here>?

Mitch looks at their faces. He can't bear to lie to a couple of kids.

He fumbles his words but composes himself.

MITCH

Look, there's a situation back at
the lab and your mom-

SCREECH. from the distance the sound of burning rubber blares
from far away. A grey car similar looking to the one in the
IDEA commercial approaches them and drifts sliding into the
wall of the school

TONY

What about mom?

Mitch takes them both by the collar and throws them into his
car

The approaching gray car slams into a car next to mitch's
where the kids were standing in front of.

The car is totalled, no one could survive that.

Marty turns around and sees this.

MARTY

That's a MARK 17...

TONY

A what?

MARTY

It's the latest green effecient
sports car-- but mom said they were
still working on it!

The car pulls back. A broken windshield revealing its
interior. One of the grey guys. It stares at the Mitch's car
menacingly. Then drives straight towards them.

TO BE CONTINUED
