EXT. SCHOOL PARKING LOT. TWILIGHT

Darkness. A car pulls back, opening the screen for us. Light as we see Mitch and the Mendoza boys paralyzed in fear.

A broken windshield revealing a ruined car's interior. One of the guys in grey suits is inside, staring daggers into Mitch menacingly.

POV: the Grey Guy's HUD locks in on Mitch's pocket where we see the DEVICE

MITCH
(slowly) Kids (beat) put on your
seat belts.

Marty and Tony look at each other before quickly doing as Mitch says.

The grey car begins to rev, it's wheels leaving a cloud behind it. Ramming into us the grey guy's cold emotionless expression is the last thing we see.

CUT TO INTRO:

INT. MITCH'S CAR. TWILIGHT

Touch screen ignition. Music starts.

EXT. SCHOOL PARKING LOT. TWILIGHT

The grey car moves to ram them and Mitch pulls away in the nick of time

The car that was next to his is completely torn to shreds. Mitch drifts out of the way and makes its way to the exit driving through traffic,

The grey car once again pulls away and follows. Tony's teacher comes out to the car that was just destroyed. He pulls out his keys and clicks the beeper the destroyed car makes the sound.

EXT. CITY STREETS. SUNDOWN

The freeway is cluttered as Mitch swerves through traffic to avoid the grey car, it's quickly gaining up on them

The grey car chases the gang into the busy streets of the city. Mitch weaves his way through traffic.

TONY

Mitch you think you can DRIVE
BETTER!?

MITCH

shoot shoot, oh wait, duh of course

Mitch flips a switch next to the air conditioner, suddenly an entire HUD appears on the windshield with different stats and reticles highlighting the other vehicles. The car is now in autopilot mode. Mitch takes this opportunity to get something important from the glove compartment.

MITCH (CONT'D)

Ahah! Here it is!

Mitch pulls out a scanner of sorts. He plugs it into a socket on the dashboard.

TONY

What is this thing?

MITCH

This is TRIX-E, my pride, and joy.

A window pops up on the windshield monitor showing the car behind them. in a BRIGHT RED INTERFACE, it displays that it's running on Sylthium.

MITCH (CONT'D)

That's Kobayashi's new fuel! Now we know that thing isn't getting tired anytime soon; let's take this somewhere where it can't hurt anyone.

TRIX-E swerves several lanes to the right attempting to get on to a recommended entrance to the highway, when all of a sudden

BOOOM

an explosion to their right
knocking other cars on that lane
into the air, forcing TRIX-E to
move over to a left lane.

TRIX-E

Rerouting

Tony turns around to see the MARK 17

TONY

What the-

The MARK 17 has two large energy cannons on its side

MITCH

Yeah that thing's not supposed to
have those! Hold on guys!

Mitch takes a sharp turn, cutting through the lanes till he
reaches the exit. The grey guy follows behind.

EXT. HIGHWAY. SUNDOWN

The chase continues into an empty highway

MITCH

I didn't wanna have to do this

As they speed along Mitch flips a small door open on his
stick with a red button on it. He hesitates for a second
before pressing it

From the back bumper of his car drops a chain of mines with
red lights as they beep.

The MARK 17 is too late to notice them and as it attempts to
swerve away from it, it drifts onto the mines causing them to
explode.

TRIX-E "Akira slides" to a halt.

Mitch looks at the wreckage with remorse.

MITCH (CONT'D)

TRIX-E... scan for life signs

TRIX-E

No life signs detected.

Mitch is distraught at having taken a life

TRIX-E (CONT'D)

Movement detected.

MITCH

What?

Tony screams at the top of his lungs, he is terrified, but of
what?

Marty tries to calm him down. Mitch turns to the wreckage and
realizes why Tony was in shock.

A dark silhouette stands in front of the wreckage's flames
with some sort of red eye

MITCH (CONT'D)
That's a relief. It clearly isn't
human. (beat) It's an android.

Now with a more relaxed expression, Mitch reaches for a button by the air conditioner.

Mitch's car opens up and slides out his seat. the seat then rotates to face the grey car. Attached to the seat is some kind of EMP canon.

MITCH (CONT'D)
Okay, try this on for size.

Mitch's canon lights up and blasts an electric wave, enveloping the automata.

It stands for a few seconds and then falls flat. Marty and Tony sigh with relief. Mitch looks back at them.

MITCH (CONT'D)
There that wasn't so bad.

The automata appears right behind him all melted.

TONY
Mitch look out!

The silhouette grabs Mitch by the head and throws him onto the pavement.

It pays him no mind, **he's not its target.**

It reaches into TRI-X-E to grab the boys.

MITCH
Activate passenger defense!

A force field appears between the silhouette and the boys as it rampages against it. It realizes the futility of blunt trauma, morphing its arm into a saw wheel grinding away.

Mitch tries getting up, but his strength fails him. The muffled screams of Marty and Tony as the machine continues cutting the force field.

His vision begins to fade as exhaustion takes him, bringing him back to another time.

INT. IDEA MECHANICS FACILITY. 10 YEARS AGO.

We continue to hear grinding but now we're somewhere else. A factory of sorts. A row of conveyer belts carrying vehicle parts laid up like pillers. A temple of industry.

Among the steel columns and sparks of light walks a young Mitch (8) as we hear his father call for him from afar.

DR. SIMMONS

Mitch!

The boy hides, we see only the bodies of Dr. Simmons and others as they search for the boy. As they head off he peeks out to a lone mechanic working on a small garage.

Cautiously, he heads over to get a close look, the mechanic's head is in the head of car. As he gets closer he slips up, kicking a small screw on accident and alerting him.

MECHANIC

Oh good, you mind handing me the jack over there?

Mitch turns and sees 3 tools, unsure, he picks up whatever and hands it to him.

MECHANIC (CONT'D)

Thank--

He removes his head from the car.

MECHANIC (CONT'D)

Alright man, you tryin to mess with me here?

He has a good view of the kid now, looking down a little ashamed.

MECHANIC (CONT'D)

Ah geez, sorry bout that, guess you wouldn't know what a jack is.

He heads over to the table and picks up the right tool, holding it in front of Mitch

MECHANIC (CONT'D)

This here's a Jack, see how the reach is? and it's got all these neat tools on each side.

He hands it to Mitch who can barely lift it, he turns it to see each side, holding on to it with both arms.

MECHANIC (O.C.) (CONT'D)
Every problem has a right answer,
and every job has the right tool,
once you know that, you can fix
just about anything.

We can hear the sounds of the grinding getting loud again,
and Marty's muffled scream.

MARTY (O.S.)
Mitch help!!!

CUT TO:

EXT. HIGHWAY. SUNDOWN. PRESENT

Mitch's eyes shut, opens them wide. He lifts himself
slightly wobbling, but heads straight forward. A light glows
in his pocket, the device. We see it has a display
"Operation Materializing.

A hologram in the shape of a jack then materializes in his
hand little by little, Mitch is in shocked, can't make heads
or tails of it, but he's snapped out of it by Tony's screams.

TONY
Mitch! help us

The machine still grinding through the force field begins to
crack through it little by little. it can't take any more of
this.

Mitch holds the jack stretched behind himself.

MITCH
Hey you!

The automata turns around

The starts to spin in his hand like an electric shuriken as
he forces himself to throw it at the figure.

MITCH (CONT'D)
Why don't you take a break!

The jack flies right through the automata as it disappears
into thin air after flying a certain distance

The automata stands still as its entire left side falls to
the ground, perfectly split down the middle.

Mitch sighs with exhaustion as he limps towards his car.

MARTY
Are you okay Mitch

MITCH
(fatigued) huh? oh yeah, I just
need to make a call so could you
guys keep quiet for a bit.

Mitch grabs his phone out of his pocket which is all cracked now and calls a contact that says "REN"

INT. CURIE UNIVERSITY. AFTERNOON.

A phone rings inside a bag. The caller reads "MITCH" a hand reaches in to turn it off hastily.

PROFESSOR (O.S.)
Ms Zhao!

A girl springs up from underneath her desk, long raven hair and violet eyes. She looks noticeably younger than anyone else in the class.

PROFESSOR (CONT'D)
Since you have plenty of time to
play with your bag I assume you did
the extra credit?

REN
Oh! Uh, to be honest I didn't
really have time, I was kind of
busy

COLLEGE STUDENT #1
With what? Daycare?

A small group of older girls in a corner of the room giggle to themselves, the rest either ignore or look at them in disapproval.

PROFESSOR
Out of my class Ms Forster! We
won't be having any of that in my
class thank you.

The girls just get up and leave.

PROFESSOR (CONT'D)
Now then, Ms Zhao, since you think
you're good enough to not need the
extra credit then I assume you can
solve this problem right here.

The professor uses his eyes to navigate the UI in his glasses. A holographic projector in the center of the room shows schematics for a reactor

PROFESSOR (CONT'D)
As you can see this is a type B-97 reactor constructed after the outskirts war. In this scenario the reactor is for some reason unable to produce....

The professor keeps going, and Ren is in something of a trance. She's blocking out the professor's words as she hones in on the schematics. A faulty piece deep within the bottom floors. The sound of a bell rings in her head.

EXT. CURIE UNIVERSITY. AFTERNOON.

Ren runs out of the classroom in a hurry by herself. She runs past the janitor

JANITOR
Hey Ren! Class over?

REN
Yeah, just for me though!

INT. CURIE UNIVERSITY. AFTERNOON.

The professor is left stumped in front of the projector along with the rest of the class. There's a beat of silence. He gets up

PROFESSOR
Okay! Can anyone explain what she just did? (beat) Anyone?

EXT. CURIE UNIVERSITY. AFTERNOON.

Ren takes out her phone and calls Mitch back

REN
Hey Mitch, Sorry I was busy, what's up?

A beat. Her face darkens

CUT TO:

EXT. MIDDLE SCHOOL. COUNCILOR OFFICE

A camera lens. We're so close that on the outer ring we can see "KOBAYASHI ELECTRONICS" around it as it focuses in. Reflected in it is Dasha and Chandra in the councilor's office.

INT. MIDDLE SCHOOL. COUNCILOR OFFICE

Chandra and Dasha are sitting together across from the school counselor, a tired man in his mid 30s looking as if he's doing this for the 10th time (he is)

COUNCILOR

Can you girls tell me what violence is?

A little hand, Chandra's, raises up next to his face

COUNCILOR (CONT'D)

(bored) This isn't a class you can just say it out loud.

CHANDRA (O.S.)

It's when someone hurts someone

COUNCILOR

(faux excitement) Very good Sansa

DASHA

It's Chandra!

COUNCILOR

Right, sorry, Chandra. Now you Sansa

CHANDRA

That's Dasha

COUNCILOR

Right, Dasha, Do you know what violence is?

DASHA

It's what you use to make dumb people stop--

The councilor starts writing something down

DASHA (CONT'D)

I mean it's when you hurt someone

COUNCILOR
Very good, so that means you both
know what violence is.

They nod

COUNCILOR (CONT'D)
So you must also know that violence
causes harm. Which is bad.

DASHA
Only when it happens to good people

COUNCILOR
San-- Chandra

DASHA CHANDRA
Dasha! Dasha!

He's getting irritated

He focuses on Dasha, looking away, arms crossed.

COUNCILOR
We've gone over this so many times.
You're a smart kid, you're the only
one here studying nanotech at your
age. If you just kept your record
clean you could even get into Curey
University!

Then on Chandra, rocking in her seat hardly paying attention.

COUNCILOR (CONT'D)
And Chandra you have a wonderful
imagination. If you just made an
effort to share it with your
classmates I know you can have so
many friends!

CHANDRA
Christy tried to cut off BiBi's--

A knock on the door. The school receptionist peeks in

SCHOOL RECEPTIONIST
Sorry to bother you, but there's a
man here to pick up Dasha, he says
he's a relative.

He turns to Dasha who has an equally confused face as him

COUNCILOR
Do you know anything about this?.

Dasha shakes her head.

Drone's POV: we see Dasha speaking through the window

DASHA
Maybe uncle Viktor? But he's
supposed to be in Groznyy

The councilor sighs, then gets up

COUNCILOR
Well, I'll go see what this is
about. you girls stay here while I
get this all sorted out.

The girls are alone now. Dasha is looking right out the
window Chandra stops fidgeting.

CHANDRA
We did something wrong didn't we?

DASHA
You didn't Chandy, just me.

CHANDRA
But you were just protecting me.

Dasha turns to Chandra, giving her a tender smile.

DASHA
That's right Chandy, and I always
will

INT. MIDDLE SCHOOL. FRONT OFFICE.

The councilor heads to the front office to meet with a BLONDE
MAN wearing SHADES (late 20s)

COUNCILOR
Sorry about the wait Mr--

The man quickly responds

"VIKTOR"
Viktor, I'm here for Dasha, her
mother sent me.

COUNCILOR
Oh right, Dasha mentioned you, did
you just get back from Groznyy?

"Viktor" has a blank stare as he walks past him. The
councilor. Is befuddled.

COUNCILOR (CONT'D)
Hold on a sec!

The councilor tries to follow him.

COUNCILOR (CONT'D)
Look I don't know what customs your
used to be we generally only allow
children to go with a gaurdian if
the their parents call--

"Viktor's" ahnd morphs just like the machine in the highway,
turning into what looks like a cattle prod. He electrocutes
the councilor, knocking him out.

Viktor paces aggresively.

INT. MIDDLE SCHOOL. COUNCILOR OFFICE

Something out of focus moves down the window frame, hovering

CHANDRA
That's a pretty bird!

EXT. MIDDLE SCHOOL. COUNCILOR OFFICE.

A drone is floating just outside the office, beneath is
something like a gun barrel.

We can see inside of it, a dart is being loaded.

POV: The HUD locks onto Dasha first. Then on Chandra. The
text: "PRIORITY TARGET FOUND" shows up on the screen.

INT. MIDDLE SCHOOL. COUNCILOR OFFICE

DASHA
What?

The drone's lights begin to flicker as it prepares to fire

CUT TO:

EXT. FOREST. BEHIND THE SCHOOL. TWILIGHT

The revving of an engine as we see wheels rotate, covered by
plating. Not a motorcycle, but a teal moped. The rider, a
young lady wearing a helmet and goggles.

With the click of a button it springs into the air heading straight toward the drone, landing right on it.

The girls are shocked.

INT. MIDDLE SCHOOL. COUNCILOR OFFICE

The girls look at the window, the cool girl who just smashed that drone takes her helmet off revealing--

CHANDRA
Ren!

DASHA
Ren!

INT. MIDDLE SCHOOL HALLWAY.

A stinging noise. "Viktor" has been alerted, the drone's signal is gone, displayed in it's UI. The aggressive pace turning into a sprint

INT. MIDDLE SCHOOL. COUNCILOR OFFICE

Viktor slams the door open with a great force shattering the glass on the door. POV: his eyes scan the room tracing a path leading to the destroyed drone.

EXT. MIDDLE SCHOOL. CLASS 3

Viktor hops out of the window scanning the remains of the drone. A trail of tracks leading into the streets. Viktor sprints toward the trail till--

A jingle plays in his head, we hear a voice:

GARROUSEN
Abort operation. Regroup, we have
what we need

(beat)

GARROUSEN (CONT'D)
For now...

"Viktor" closes comms. It stands still before turning away running into the forest as we hear police sirens arrive on the scene.

FADE TO:

EXT. CITY OUTSKIRTS. SUNDOWN

Mitch's car drives through the empty highways leaving the main city. His car is now even more banged up and scratched than before. The three sit silently in the car till one breaks the silence.

TONY

Soooo you're not gonna tell us what all that was?

MARTY

Tony!

TONY

What?! he owes us some kind of explanation after that!

MITCH

To be honest guys, I don't really know myself. I just thought of what I could do and the right tool just popped out.

MARTY

How does that work, why tools?

MITCH

I don't really know, I mean I like working with mechanics so maybe that has something to do with it? I don't know what your mother and her team meant to do with this.

MARTY AND TONY

Mom!?

MARTY

What happened to mom?!

MITCH

She uhh...

Mitch looks at the rearview mirror seeing their faces, hoping for some good news. He sighs.

MITCH (CONT'D)

Look, your mom. She was--

COOVER (V.O.)

Thrown in a bag and dragged away.

CUT TO:

EXT. IDEA LABS. SUNDOWN.

A man in a large trench coat. DETECTIVE COOVER. stands before the ruined tower of IDEA LABS, the top floor stained in embers and an army of officers rushing through

The streets are blocked off by poles emitting holographic "DO NOT ENTER" or "CRIME SCENE" warnings. The press is in a riot.

OFFICER 1

What are you even saying now Coover

COOVER

Just practicing my lines.

OFFICER 1

Man, why'd I get stuck with you today?

COOVER

Your guys called in tech terrorism so you get a tech terrorism guy, that's how the world works.

A closer look at Coover reveals no tech. Not a single enhancement on him unlike the officer.

The two march on in as the press continues to try getting a question in.

POV, a news camers zooms in to get a shot of Coover entring the building.

INT. IDEA LABS. RECEPTION.

The tables and chairs are pushed over, the elevators are smashed and the computer is fried. About half a dozen officers are looking around every inch of the room.

Coover and the officer make their way to the staircase

COOVER

They sure

OFFICER 1

It gets worse.

INT. IDEA LABS LOWER FLOORS.

We Ascend IDEA labs floor by floor. No blaster burns. Much of these were largely undisturbed.

OFFICER 1
The building's defense systems
stopped the elevators before they
could reach the upper floors.

COOVER
What about alarms?

We see an officer in a corner inspecting a device with an
antenna.

OFFICER 1 (O.C.)
Jammed.

INT. IDEA LABS UPPER FLOORS.

Ruin, there's only rubble and burn marks where the elevators
used to be. The walls are covered in blaster burns. And lab
rooms are completely cleared out of equipment

COOVER
Cozy.

COOVER (CONT'D)
Whole floors are like this from
here on, watch your step.

The detective trips, recovering himself as he notices a hole
to the floor below. He maintains composure.

COOVER (CONT'D)
Casualties?

OFFICER 1
Lot of injured, but no fatalities,
however.

They make their way into a familiar room. The lounge where
everyone had just been celebrating. Worse than how we left
it. Tables scattered, windows broken, and the viewscreen
displaying a pleasant view cracked and glitched.

We see the officer explaining something to Coover but instead
we hear Mitch

MITCH (V.O.)
They took everyone. Your mom, the
Kalams, the Pavlovs. Everyone,
involved with this device.

Coover motions as if he's smoking, but his hands are empty.

COOVER
 Thrown in a bag and dragged away

INT. MITCH'S CAR. SUNDOWN.

Mitch is driving Trix-E along a seemingly endless road, far from the chrome plated buildings of the city. The boys are quiet, somber.

TONY
 So we're saving mom right?

Mitch is surprised

MARTY
 Where would we even start?

TONY
 I don't know, but I mean we gotta do something right, Mitch?

Mitch can't respond, he doesn't have the right words to tell him, but he works with what he has.

MITCH
 I can't really say anything for sure. We're in the dark here. We don't even know who these people are or what they want.

TONY
 Then we figure it out!

MARTY
 How?

CUT TO:

INT. IDEA LABS.CRIME SCENE. SUNDOWN

The lab is not how we left it. Officer scrambling around on the scene recovering clues. The power in the building completely shut off, but the place is brightly lit by Light stands covered in police branding.

Amongst the crowd of lawmen, stands Coover, eyes wide, mind at work. After a beat something catches his eye. A dead pixel in the sun.

The officer approaches him.

POLICE 1
Bottom floors are scrubbed clean,
no calling cards, no Notes.

COOVER
And in that lies the flaw of the
modern police officer

POLICE 1
I beg your pardon?

He makes a flashy turn. His coat flowing behind him

DETECTIVE
Tell me Captain

POLICE 1
I'm actually a deputy

DETECTIVE
What direction does the sun
set?

POLICE 1
Huh?

DETECTIVE
The sun. Where does it set from
here?

The officer turns to the windows. POV: a compass widget at
the top of his view dictates its setting west

POLICE 1
Says for me it's west

DETECTIVE
Tisk Tisk Captain. Relying in
cyberinterface is precisely why
this city is going down the drain.

POLICE 1
Like I said I'm not a captain

Ignoring him, The detective takes a lamp from the ground and
throws it at the window alarming all the officers on the
floor.

The screen shatters revealing it's in fact a screen. Behind
the glass now shattered the sun is setting on the east,
showing 2 suns.

POLICE 1 (CONT'D)
What do you think you're doing?!

The detective walks towards the wall where an unassuming device is plugged into the wall. As he unplugs, the view shuts off revealing a red screen with a manifesto.

DETECTIVE

Doing your job

He gives a smile as the manifesto lightly glitches behind him.

MARTY (V.O.)

So there's no hope. We're alone on this.

INT. MITCH'S CAR. NIGHT

Mitch looks ahead for a beat. A small smile emerges from his lips, just an ounce of hope.

MITCH

Nah, we're not.

He pulls up in the middle of the empty road. Just ahead, a light in the dark.

CUT TO:

EXT. DESERT ROADSIDE. NIGHT

Ren's moped rides on the empty road approaching the light of Mitch's car. Dasha clinging on Ren's back while Chandra is grabbed on to Dasha's.

DASHA

Man, Chandy when'd ya get so heavy?

REN

Sorry guys! I've been meaning to put in a side car but I haven't gotten around to it!

Mitch's car parks next to a sign that says "DANGER, RATTLESNAKES" looking close, we see a hole in the first "A" there's a glare on it like a lens.

Mitch gets out first then the boys. Ren's moped gets closer and closer, then

CUT TO BLACK.

We hear something else. The whirring of wires and machinery.
We move slowly out of the shadows.

INT. SECRET LAB. CONTAINMENT FACILITY.

We move around a room full of computers and monitors, wires covering the walls and dust on black screens. We pass by a containment pod that reads "081"

We begin to focus on one screen, pitch black until suddenly;
LIGHT. A terminal displays several processes. A line that says "movement on surface detected" A small screen showing footage of what looks like Mitch and the boys.

The small window disappears and a screen now displays the words:

"INITIATING SECURITY PROTOCOLS"

We can hear the sound of something opening and the stomping of something large and metal.

TO BE CONTINUED
