Address
Phone Number

We open on darkness, sounds of modern computers, unfamiliar dings and soft clacks. We now see an OS startup: A logo that says Geist-Soft.

The wallpaper is of a forest with smoke in the distance. A window opens up and we see traffic footage. Two cars in a rigorous chase. A new window opens. Footage of an altercation of a highway, Mitch's battle.

The two windows are bundled side by side as an input is heard on the computer. The two footages scroll forward and back till they land on a single frame. Both zoom in to spot the same license plate. SAME AS THE ONE MITCH LEFT BEHIND.

We see him call someone on his phone, but we can't hear

The screen gets smaller, then another one lights up next to it

More windows open up. Police reports stating MISSING CHILDREN and a teacher left unconscious.

Another screen opens with more windows. screens boot up in succession till we're seeing nine screens with documents covered in highlights

CUT TO:

INT. POLICE STATION. MORNING

On the reflection of Coover's eye we see the screens changing as a cloud of what looks like smoke streams upward.

His door opens.

OFFICER

They're ready for us, detective.

The officer leaves. We see Coover through the crack of the door he starts getting up. The smoke was steam from his coffee as he's surrounded with the holographic monitors display all of his material.

Before he leaves we see the flashdrive he recovered at IDEA for a moment before he grabs it.

CUT TO INTRO

INT. POLICE STATION. BRIEFING ROOM. NOON

In the dark, we see a holographic projection of the screen of text from the crime scene at IDEA.

A faint image of a hammer with sparks flying. Now we hear a voice. It sounds crisp yet distorted

MALICIOUS VOICE

The fruit of labor is always withheld from the laborers. Locked away behind an astronomical number of unattainable wealth. The rust on our hands, the sweat off our brows don't they have worth too? Don't we deserve to reap the rewards of our work? Not in this system, not in this chromed facade of a city. This goes out to those would defend its false honor. Head our warning. Should you stand in the way of our grand crusade, you shall be met without remorse, without mercy, without--

The recording fast forwards

COOVER (O.S.)

He goes on another 10 minutes of diatribe. Then--

Stop. Then Play, as we see the faces of several officers in the room one after the other

Fear us, for we shall Build. Build. Build. Build. Build. Build. For we are the ones who built this city. With OUR own hands. And it is with OUR HANDS THAT WE WILL CREATE OUR OWN FUTURE. OUR OWN FUTURUM

Stop. The lights come back on. Coover spins his chair around to face the rest of the room as the hologram dissolves

A beat of silence in the room

OFFICER 1

So this group. I suppose they're calling themselves "Futurum" then?

COOVER

Honestly sounds like a working name to me

The chief does a performative cough shooting Coover a sharp gaze.

CHIEF

Reports have come in over the past 24 hours telling that the cameras have been almost completely scrubbed clean, So no official image of the perps. However we've had a handfull of eye witnesses all saying the same thing: Men in grey suits coming in and out the building, and reports of screaming coming from a--

He picks up and reads off his tablet

Quote: "military grade dropshift from some kinda video game or something" That's from an eyewitness

OFFICER 2

Our missing scientists?

CHIEF

Most likely. However not a single one was able to ID any faces.

COOVER

It's worth noting that none of the officers at the scene were able to spot this device even though it stuck out like a sore thumb. (side eyeing one of the officers) Some kind of cyber cloaking making it invisible to augments. Which of course is no problem for myself.

The chief makes another fake cough as if saying "shut up". Many officers look a little annoyed at Coover's smug demeanor.

OFFICER 2

No real motive in this though. Just unfiltered ideology. Why would they kidnap all these scientists.

OFFICER 1

Seize the means of production?

COOVER

Maybe. If that were all the leads here that'd be my first guess. However.

He clicks on the projector's remote. We go into a slideshow of images. Each image is a different component in the device

COOVER (CONT'D)

This was a jammer left on one of the floors. Main reason we weren't able to recover any footage. The kicker here is it's a custom. Looks professional but it's a bit of a mutt. Different componenets from different companies: IDEA, SLADISLAW.

LIEUTENANT

What's your point Coover

Coover shoots a smile stunning the lieutenant

COOVER

Thank you Lieutenant for asking the magic question! In my investigation, I found that these parts are not on the market

OFFICER 1

They're prototypes

COOVER

Bingo!

The holographic projector switches to news from several months ago

COOVER (CONT'D)

These are some of the reports we've been getting of missing equipment stretching as far back as 6 months ago. All of these tech companies have refused to specify which objects were stolen, likely due to the classified nature of their research so we were unable to help them further, however amongst these companies are the ones connected to these parts.

The whole room sits in silence, writing down notes.

CHIEF

Thank you Coover now--

COOVER

Just one more thing.

The chief is caught off guard and the room simultaneously groans. Coover then takes the remote and switch the projection to several videos and screenshots of traffic footage.

COOVER (CONT'D)

As we all know the children of the kidnapped scientists have also disappeared and many here would believe that they were taken by the perpetrators as well. However as we can see here, there are several inconsistencies of the recordings now if we look here--

CHIEF

That'll be all Coover!

The lights turn on and the projection force shutdown. Coover looks visibly perturbed by this but he keeps his mouth shut.

CHIEF (CONT'D)

Everyone else dismissed, Coover you stay.

The crowd of officers leave the briefing room only the chief and Coover are left.

CHIEF (CONT'D)

Jenny!

The receptionist, Jenny peaks into the room on command

CHIEF (CONT'D)

You can bring them in

JENNY

Of course Chief!

The chief walks to the end of the room.

CHIEF

14 years and you're still the stickler for details.

COOVER

18 if we count the academy, and it's not just details. There's something seriously wrong with how these kids just vanished.

CHIEF

Oh I agree Coover, which is why I'm gonna leave the labs to our other detectives. You on the other hand, I want on the scientists.

Coover has a twinge of relief and disbelief in his eyes.

COOVER

Sir, I don't know what to say.

CHIEF

No need to say anything.

He takes a beat serving himself a glass of water

CHIEF (CONT'D)

To be honest Coover, I've always respected your "reservations" about the augmentation standards in this station. Anywhere else you probably would have been thrown right onto the street.

COOVER

So why am I still here

CHEIF

Call me a spiritualist detective but I believe in balance, Ying and Yang. Augmented and Unaugmented. And I believe you to be a solid Yang for most officers for years.

He takes a long sip of his water

Lately, however, it seems your peers believe you're too much Yang, that you slow down the process with in depth procedures and eccentricities.

COOVER

Any problems they have they can take it up with me and me alone Chief.

CHEIF

There'll be no need for that Detective, for I have your perfect Ying

The door opens

CHIEF
Ah! Perfect timing!

A young woman in uniform steps into the room.

CHIEF (CONT'D)
Meet your new partner for this
case. Officer Lamarr

LAMARR
Pleasure to meet you I've heard a
lot about you.

COOVER
Chief what is this?

Lamarr's smile fades into a forced grin

CHIEF
Look I understand you prefer
working alone but

COOVER
No I mean what is this

He approaches Lamarr Lifting the hair covering her ear
revealing a Kobayashi branding right on the neckline

Chief sighs

CHIEF
I was hoping I'd get to explain
first but, alright. You're to be
paired up with a new brand of
experimental technology. An
"Artificial Officer", AO's for
short.

COOVER
And you slapped this onto me why?

CHIEF
Didn't you hear what I was saying?
You're slow Coover! It takes 4
months for you to solve a case that
would take Officer Daniels 3 weeks
at most.

COOVER
Daniels also has had more false
convictions than half the station
what's your point?

CHIEF
My point is-

LAMARR
Please chief, allow me.

Lamarr turns to Coover.

LAMARR (CONT'D)
It is my understanding detective Coover that you have a commendable gift for seeing past technological defenses. However if we join your skills with my capabilities, We may be able to solve the case both efficiently and quickly.

COOVER
So what you're gonna have me clean up your oversights is that it?

LAMARR
Only now and then.

Coover sends her a death stare

LAMARR (CONT'D)
Apologies, that was my attempt at a joke.

CHEIF
See? Ying and Yang.

The chief makes his way out the room

CHIEF (O.S.)
Find those kids.

COOVER
Chief wait! I never agreed to-

The door closes on him.

CUT TO:

INT. IDEA COMPOUND. DAY 3

A screen showing a vectored rendering of the lab takes us through various rooms as soothing atmospheric music carries us away.

HELEN (V.O.)
Compound 59, which has been
lovingly dubbed, the Experimental
Research Center for Human Innovation
or ERCHIn, was designed as a space
away from IDEA labs for free design
and experimentation.

The frame zooms out as we see the full view of the lab's
layout.

HELEN (V.O.)
The lab is operated and managed
through a state of the art
mainframe arbitered by me, HELEN.
Which stands for

A loud Buzz permeates as the screen cuts to black with the
text REDACTED in large white print.

HELEN (V.O.)
A state of the art AI composed of
data accumulated of IDEA's 25 year
legacy! Developed by

REDACTED SCREEN

HELEN
Dr. Mendoza

REDACTED SCREEN

HELEN (CONT'D)
And

REDACTED SCREEN

HELEN (V.O.)
For the sole purpose of--

SMACK A drone crashes into the screen now displaying a space
station, cracking it as it leaks plasma. Audio
unintelligible as it glitches

TONY (O.S.)
Crap! Sorry!

We follow the drone as it speeds through hallways. Flashing
by GENERATOR ROOM, FACTORY, ASTROPHYSICS, and finally
entering NANOTECH

INT. NANOTECH R&D. MORNING

Still in the drone's POV we overlook Dasha, goggled up in front of a work bench, in front of her is a metal platter with small grain of metal. She takes a tool. A small zap emits. Chandra is sat down in a corner.

The grain of metal turns into a swarm dancing around her tool as she waves it like a wand until, a sudden destabilization. It morphs into shapes

DASHA

Get down!

She drops her "wand" and gets down under the table, Chandra does the same. The maw of steel rumbles and chases till it SHOOTs OUT BULLETS THROUGH THE ROOM, a smudge of the metal grains gets on the drone as it flies away, POV obscured.

The metal smears away almost as if it has a mind of it's own

TONY

Yeah, I'm not gonna ask about that

The drone continues its tour of the lab as we now enter familiar territory

INT. GARAGE. MORNING

Zooming past rigs of vehicles we see Mitch fixing up Trix-E looking brand new and premium.

MITCH'

TRIX-E could you connect your tire pressure meter to my display?

TRIX-E

Of course Mitch! Sending it right your way

Mitch takes an automated pump to the wheels setting it right next to his side.

TRIX-E (CONT'D)

Pump secured

We move away from Mitch just a few degrees till we see Ren tinkering with the exoskeleton she had admired before. Next to her is a mini projector showing a recording of an old fight

She's only half working on it, while the rest of her is cheering on the fight.

Our view shifts to an open vent, the drone flies straight into it, sharp turn after sharp turn, a faint voice is heard

MARTY (O.S.)
Come on- come on!

Marty's frustration becomes more and more audible as we come closer to the light, a new opening in the vents into--

INT. CAFETERIA, MORNING

Marty is clacking at the keyboard away furiously in his computer, though it doesn't seem to be the same one he came in with. A sleek keyboard devoid of a physical monitor, and interactive projection with lines of code scrolling at max speeds

HELEN (O.S.)
Please understand that my systems
were put in place in order to--

Marty smashes enter and another monitor materializes by his head

MARTY
Take that!

He continues to move his hands in a trance, commands as easy speaking. We move out of the drone's POV into the screen, the lines of code, the windows gone.

INT. HYPERSPACE

Marty is standing in an empty space with a chrome woman right behind his shoulder, our first time "seeing" HELEN. He's before a wall that stretches into infinity, interacting with a puzzle box that shifts in his hand.

HELEN
I understand your frustrations
Marty, but contact with the outside
world, even virtually risks our
location being compromised.

Marty still focused on the puzzle

MARTY
Mom would probably say the same
thing, and just like mom I know you
won't do a thing to stop me.

HELEN

You seem to hold something against
Dr. Mendoza, may I pry on the
matter?

MARTY

No you may not

HELEN

And yet you defy my own wishes,
your mother's wishes.

MARTY

She can yell at me all she wants
once we rescue her.

A dead silence between them, the puzzle box is losing its
layers. HELEN seemingly unphased.

HELEN

And what will you do once you've
regained access to the wider net?

MARTY

I've got connections, people that
can help me track down the people
that took our parents.

HELEN

People you can trust?

MARTY

No, but I'm careful. No one's ever
found me, even those who've tried.

The layers keep peeling away

HELEN

So they'd be a danger

MARTY

I said I'm careful!

The box is almost "naked" We see a LIGHT BLUE GLIMMER where
Helen's eyes are

HELEN

Then they'd be a liability

MARTY

Helen I said--!!!

The box turns red and begins to tremble. The wall turns red as HELEN disappears. New layers of the box begin to form one by one in Marty's hands.

In a rage, he lifts it over his head and throws it down into a--

SMASH CUT TO:

INT. CAFETERIA, MORNING

His open hand smashes against the table rattling the computer. He sits in the silence as the drone looms over in the corner.

POV the camera zooms on him as he's hunched over, no longer typing away at the computer.

INT. TONY'S BEDROOM.

He's wearing the drone's FPV display goggles with a slight frown. He mutes his mic and sets the goggles down.

TONY
You need to chill bro.

INT. MADS' MAD DINNER. NOON

A digital ring as the door of this fine establishment opens. Coover walks in slumped over with a pissy vibe.

WAITRESS
Take a seat hun

He makes his way towards an empty booth. Coming up close behind him by a dozen steps is Lamarr in ATTENTIVE POSTURE.

Coover plops down in his seat as Lamarr follows suit right across from him. They sit for a beat, Coover not saying a thing as he looks over the menu, while she continues to stare

COOVER
Can I help you with something?

LAMARR
Not at the moment no

He ignores her and continues to gaze the menu. Another beat passes

COOVER
You want to look over the case huh

LAMARR
Do you want to look over the case?

COOVER
Let's look over the case.

CUT TO:

INT. DINER. LATER

Empty plates smeared with syrup and ketchup decorate the edge of the table as a glass tablet displays various profiles on the missing kids

LAMARR
So the license plate at the scene.

COOVER
That's right, the wreckage found at the scene did not match with the plate's previous records. However the vehicle registered to it is unmarked.

LAMARR
A custom

COOVER
You're not getting brownie points from me, but yes.

LAMARR
Because I'm machine?

Coover has a mouthfull of pancakes.

COOVER
0 points

The waitress comes by with his check.

WAITRESS
All set, and you get a discount next visit!

COOVER
Thank you kindly.

She walks off, lingering a smile at Coover who's looking pleased as peach.

LAMARR
You're chances of success with
courting her are 73%

COOVER
Pardon?

LAMARR
Her eyes indicated a level of
affection. I noticed it when she
came to pick up the bill. Your
dating profile also suggests that
she's exactly--

COOVER
Another joke?

LAMARR
0 points!

A beat of silence before Coover is fed up. He pulls up an
image of Mitch's Company ID

COOVER
The license plate appears in IDEA's
records, it's registered to Mitchel
Simmons, Intern and son of the
former CEO.

LAMARR
He was on the list the missing.

COOVER
Yep, but if this is him

He points at the figure in the traffic footage

COOVER (CONT'D)
Then it means he's part of a third
party here, either acting alone or
for someone else.

Lamarr takes the footage and scrubs through it, she notices
the moment where he appears to put something next to his
head.

LAMARR
He's calling someone

COOVER
Yeah I noticed that too, but who we
can't really know.

(MORE)

COOVER (CONT'D)

The kids that were reported missing include Dr. Mendoza's boys and the children of the Kalams, Pavlovs, and the Zhao's.

The images of their faces and the police reports pop up.

LAMARR

The Mendozas were reported missing about 30 minutes after the IDEA incident, then about an hour after that were Kalam and Pavlov at their school. Meanwhile Zhao has yet to be seen...

She takes a beat, as if in thought (more like processing)
Here eyes shift towards the image of Mitch at the highway

LAMARR (CONT'D)

What about call logs?

COOVER

First thing I checked, must've been a secure line.

LAMARR

Witnesses on the other 3

COOVER

Pavlov and Kalam were at the school councilors' office, some kind of fight at the school. Councilor was knocked out and next thing y'know the kids are gone. As for Zhao she was last seen leaving class early according to her professor.

LAMARR

Anything else?

COOVER

Not much, except, one of her classmates mentioned she was gonna get in trouble she had been playing with her her phone in cla--

Bingo. Coover is at a standstill while Lamarre gets up, dispenses cash in the tip jar as Coover's jaw is dropped. He follows her out.

INT. IDEA COMPOUND. HALLWAY

Chandra wanders the hallways twidling her fingers. She steps and slides alleviating the boredom when she stops dead in her tracks. In her view is a cracked door. She peers in carefully

INT. ROBOTICS LAB.

Unit-081 is on its back still damaged by the chase the other day. The dents and cracks left by Mitch still visible being overseen by fans of light 3D printing liquid metal on the "wounds"

Chandra moves on holding her stuffed animal close, the lights of the repair equipment reflecting in her eyes. She focuses on the numbers on its side "081" THE 8 IS BLOCKY AND INDISTINGUISHABLE. She tilts her head

CHANDRA

Oby?

081 lights right up, lifting itself off the table as the repair equipment scatters away. It's monitor face blinks back on as it towers over Chandy it's "eyes" turning towards her

081

Greetings scientist! What please state your identification.

CHANDRA

Idonnoifijijione?

081

Doctor Idono Fijione, is this your name?

CHANDRA

Nuh-uh

081

Please state your name

CHANDRA

Chandra!

081

Doctor Chandra! Is this correct?

CHANDRA

Uh-huh!

081

Understood, you are now registered
as the prime owner of this unit
model 0-8-1, please confirm this
information

CHANDRA

That's your name?

081

I am designated as Assistance Unit
0-8-1, please conf--

CHANDRA

That's stupid, I don't like that
name

It takes in her input, processing it for a beat

081

Understood please assign this unit
a preferred name

CHANDRA

Hmmm

A beat, she looks at the number 081. She shakes her head

CHANDRA (CONT'D)

Hmmmmmmmmmmmmmmmmmm

Lightbulb! She turns and sees a red sharpie on the table and
takes it. Runs up to 081 and writes something on it. She
backs away.

CHANDRA (CONT'D)

ROBI!

081 looks down and sees Chandra has planted a bright red R
next to his model number, now spelling R081, now he looks
back at her

R081

Understood, from here on, I will be
known as R081, as per my owner's
instruction--

Chandra runs right into R081's surface wrapping her arms
around with a great big hug. It blinks its digital eyes not
knowing how to reciprocate. She knows and doesn't care.

INT. SECRET HALL. AFTERNOON.

Darkness, nothing in sight. Then, a sliver of light, thin, growing wider as it reveals a familiar silhouette. Mitch. H steps forwards as a trail of wires and tubes become more and more visible.

MITCH'

Dang, so this place has been locked
up how long again?

HELEN (V.O.)

About 25 years, since the first
time this lab was opened up.

They tread further into the path as the hum of electricity fills the hall. The top half of the halls count down:

Z-09, Z-08, Z-07 etc... As they move further along. Doors locked and rusted beneath each.

MITCH

How much further?

HELEN

We're here.

Mitch comes to a full stop. A small metal orb comes from behind him, shooting out a fan of light onto a door. The number above it smudged away minus what's left of the number 00

HELEN (CONT'D)

Please stand back.

Mitch obeys. As the door prepares to open we can see smaller shadow behind a heavy set of tubes. We can see the soft glimmer of GLASSES.

The door opens

INT. HIDDEN TRAM SYSTEM.

Lights blink and then stay as we see our first glimps of a dusty yet well preserved terminal. A glass wall guards something behind, but the thin veil of dust keeps it somewhat hidden.

MITCH

Bro what?!

Excitement marks each step, the awe is overwhelming him as the orb projects Helen right behind him.

HELEN

Dr. Mendoza deduced it would be up
your alley.

MITCH

Dang right it is!

The terminal's wall is slightly open leading into the dark
passageways. Mitch sticks his head in.

MITCH (CONT'D)

How far does this go?!

Helen projects onto the tracks balancing on them.

HELEN

The whole system leads into the
city through a complex hypertram
system. However due to certain
legalities the terminals are
located in several areas just
outside the city.

MITCH

Makes sense.

He takes his head back into the terminal.

MITCH (CONT'D)

Why'd you want to show this to me
specifically?

Her projection appears right in front of him.

HELEN

In the past few days, it's become
very clear to me that the others
are becoming restless. Eventually
they will want to leave the lab.
Though it is part of my directive
to keep you all safe I also cannot
personally keep you all here against
your will. So...

MITCH

Because I'm the oldest you want me
to make that call.

HELEN

They rely on you, and I trust
you're intelligent enough to know
when the time is right to go out
into the world.

The shadow following them moves closer into the light revealing Marty hanging in the dark watching closely.

MITCH

I dunno about that. It's not like I don't think I'm smart but between Ren's engineering genius, Dasha's nanotech and Marty's hacking ability I think they got me beat on that front.

HELEN

True those are typically more respected fields and your expertise has its limits for now. However, Ren is prone to daydreaming at the wrong times, Dasha is 12 and Marty...

Marty leans in to hear better

HELEN (CONT'D)

Marty has a difficult temperament, prone to outbursts. It'd be best for you to take the reins.

Marty's face becomes somber, retreating back into the shadows.

HELEN (CONT'D)

Oh

She sits still a beat

MITCH

What is it?

HELEN

It seems Chandra has woken up our old friend.

INT. COMMAND ROOM. AFTERNOON

Chandy sits atop R081's head looking down on her subjects as they gaze in awe.

CHANDRA

Gather around and witness my loyal guardian ROBI!!!

A beat of silence amongst the crowd consisting of Mitch, Ren and Tony, and soon enough also Dasha with the rage of a herd of bulls

DASHA

Let her go!!!

She flies in with a dropkick to R081's "gut". Unstoppable force meets immovable object as a loud clang echoes through the room.

A freeze frame of the impact. Then

CUT TO:

Dasha is on the floor holding onto her leg crying.

TONY

How?!

CHANDRA

I woke him.

REN

But how?

CHANDRA

I dunno. Look at this!

A touch keyboard appears on its head, she slams on it a little and R081's legs retract hovering above the ground.

HELEN

It seems to have transferred ownership from IDEA to her.

DASHA

What so she owns it now?

CHANDRA

Him! R081 is a he!

DASHA

She can't do that can she Helen?

HELEN

There's nothing in my protocols that says she can't.

Her gaze moves to Mitch who knows what that look means.

MITCH

Having fought it-- I mean, him.
(beat) I think he'd be a great
help.

R081 gives a thumbs up. Dasha looks at Tony

DASHA

Hey, Where's your brother?

Tony shrugs.

INT. MARTY'S ROOM

Marty lays in his bed facing away from his laptop, we can't make out his expression but the thoughts make his feelings clear.

HELEN (V.O.)

Marty has a difficult temperament,
prone to outbursts. It'd be best
for you to take the reins.

KID #2 (V.O.)

Told you he was gonna say no.

KID #1 (V.O.)

He didn't really say anything
though

HELEN

Contact with the outside world,
even virtually risks our location
being compromised.

Marty's gaze shifts up. Determination

MARTY

I'm careful

He lifts himself up and begins typing away at his computer

INT.CYBERSPACE.

Marty stands in the empty space he was in earlier. He pulls up a console and begins a process.

INT. COMMAND ROOM. AFTERNOON

Helen is with the rest of the gang as they goof around with R081. She has a smile displayed on her hologram. Then in a split second her look changes.

INT.CYBERSPACE.

Marty presses enter.

MARTY
Don't need any of your help right
now

INT. COMMAND ROOM. AFTERNOON

Helen stutters for a second. Then stops, she looks confused.

CHANDRA
Come on Helen come look at this.

She follows Chandy

INT.CYBERSPACE.

MARTY
Should give me just enough time.

He materializes the puzzle cube from earlier. His hands shifting around it turning corners, pulling levers.

INT. MARTY'S ROOM

Marty is clacking away at the keyboard, code shifting and changing at disorienting speeds. Windows pop up and close.

INT.CYBERSPACE.

Marty's hands keep going. Layers are peeled away one by one as he reaches the center. A timer appears right above his view, whatever he did to Helen was about to run out of time.

MARTY
Almost there.

INT. COMMAND ROOM. AFTERNOON

Helen stands by the children still unaware.

INT.CYBERSPACE.

Marty's still going, the timer is less than halfway out. The core is almost there.

INT. MARTY'S ROOM

Marty's breaking a sweat. Fear and dread sets in his eyes.

INT.CYBERSPACE.

A sliver of time left. The core is free. Marty grips it with all his might.

INT. MARTY'S ROOM

Time's up. Work is done. Before Marty is his coveted prize, his email page.

INT. COMMAND ROOM. AFTERNOON

Helen is none the wiser as the kids play with R081

INT. MARTY'S ROOM

He scrolls through, a lot of spam and advertisements, nothing too interesting. Except one titled "Heard you got out"

Marty's puzzled.

MARTY

Don't recognize the sender.

He clicks on it. He reads it through then leans back. It reads:

Dear Fr0g6Y

I Hope you've been well, heard around the block that you've gone awol. Don't ask my sources lol. Anyways I know you got some dangerous people after you, not to sound like a LARPer but I've got info that could help you find those IDEA scientists. Too dangerous to share here tho. Let's meet in the city.

Best

K0fuji

TO BE CONTINUED
